RESPONSE TO OFFICE ACTION

Responsive to the Office Action, dated July 18, 2001, please amend the application as follows.

IN THE CLAIMS

Please amend the claims by rewriting as follows.

1. (Amended) A method for operating a transistor cell comprising an input terminal for receiving an input signal, an output terminal for transmitting an output signal, a grounded base transistor coupled between the input and output terminals, and a current mirror coupled between the input and output terminals, the method comprising:

    biasing the transistor cell to establish a bias current in the grounded base transistor and the current mirror when the input signal is zero; and

    limiting the input signal to a range in which the output function of the transistor cell approximates a square-law.

2. (Cancelled)
